

Use: RS12 was specifically developed to complement the existing Reload-Swiss

RS portfolio. At the time of launch, it was our fastest powder. It is suitable for many pistol as well as smaller revolver calibres and especially for applications where the use of RS20 does not provide satisfactory results due to

unburnt residues.

Standard calibres: 9 mm Luger

.38 Special .40 S&W .45 ACP

Packaging units: 500 g (Can) and 4 kg (Drum).

Propellant type: RS12 is a porous, extruded single-perforated propellant powder based on

nitrocellulose.

Safe service life: If properly stored, the propellant powder remains safe to use for up to ten

years.

Verification tolerances: Batch-to-batch tolerance:

v₅ ± 12 m/s
p_{max} ± 250 bar

Key characteristics: Explosion heat approx. 4'050 J/g

Bulk density approx. 630 g/l Grain diameter approx. 0,7 mm Grain length approx. 1,0 mm
